

New Tools

Robust optical level with 32x magnification

New! GOL 32 D Professional Optical Level

- ▶ **Rugged optical level.** For long distances with 32x optical zoom.
- ▶ **Levelling accuracy. (for height transfer)**
Vertical accuracy when the vial is correctly levelled and the crosshair/telescope are focussed.
- ▶ **Compensator accuracy.** The compensator does the fine levelling adjustment.
- ▶ **Compensator levelling range.** The compensator corrects the level of the instrument at an accuracy where the levelling screws are not fine enough.
- ▶ **Objective aperture.** A large aperture allows more light for a sharper image

Specification	GOL 32 D Professional
Circle graduation	Degree
Magnification	32x
Working range	120 m
Levelling accuracy	1 mm/30 m
Clear objective aperture	36 mm
Field of view	1°30'
Shortest focusing distance	0.3 m
Compensator levelling range	15"
Operating temperature	-10 °C – +50 °C
Storage temperature	-20 °C – +70 °C
Weight	1.7 kg
Water and dust protection	IP 54
